MY SPECIALITIES

Senior Backend & Web3 Engineer with 15+ years of experience architecting resilient, high-throughput cloud platforms, event-driven microservices, and EVM smart contract systems. Proven technical lead skilled in full lifecycle delivery across distributed backend architectures (TypeScript / Node.js, Rust, PHP/Bref), serverless AWS cloud infrastructure, and low-latency Web3 data pipelines. Focused on clean system design, production safety, and high-velocity AI-assisted engineering workflows.

EDUCATION

From 2002 to 2006. — Ariana, Tunisia
IT Diploma in Technology T.S.I.C (Software Engineering)
The higher institute of technology

2002 — Chebba, Tunisia
Bachelor (Specialization in Technology)
Lyce Abou el kasem chebbi.

WORK EXPERIENCE

2012 to Now — Ariana, Tunisia
Senior Backend & Web3 Engineer
Sole Proprietorship at VIWOX

Decentralized Finance (Web3) Infrastructure: Architected and deployed production EVM smart contracts (ERC-20, staking, pool management) using Solidity, Foundry, and OpenZeppelin; built real-time off-chain indexing pipelines and responsive dApp interfaces using Wagmi, Viem, and Next.js.

Serverless Cloud Architecture & Modernization: Migrated high-traffic legacy monolithic backends to AWS Lambda and Bref (PHP/Node.js), cutting compute infrastructure costs by ~35% while achieving autoscaling reliability for peak traffic.

Real-time Web Platforms & API Systems: Designed distributed RESTful and WebSocket systems utilizing Mercure, Redis, and MongoDB/PostgreSQL, optimizing query bottlenecks and reducing average API response latency under concurrent loads.

DevOps & CI/CD Automation: Standardized Docker-based containerized environments and GitHub Actions deployment pipelines across multi-client repositories, reducing release cycles from days to minutes.

2011 to 2012 — Tunis, Tunisia
PHP senior developer
Fixed-term contract at Equinoxes , Keyrus group

Developed scalable internal architecture tools, automated deployment scripts, and engineered comprehensive unit/functional test suites using PHP, Symfony, and PHPUnit to improve release stability

2009 to 2011 — Tunis, Tunisia
PHP mid-senior developer/ Technical leader
Fixed-term contract at Tanitweb

Led technical architecture and end-to-end delivery of client web platforms using PHP, Symfony, and MySQL, mentoring junior developers in clean architecture standards.

RECOGNITIONS

Speaker — Symfony Day Tunisia (City of Science, 2013): Presented "Real-time Web with WebSockets in Symfony", demonstrating low-latency bidirectional architecture patterns.

SKILLS

TypeScript, JavaScript, Node.js	●●●●●●●●●○
Rust (Tokio, Serde, Axum, Clap, Alloy)	●●●●○○○○○○
Concurrency & IPC	●●●●●●●●○○
Solidity, Foundry, OpenZeppelin	●●●●●●●●○○
Viem, Ethers.js	●●●●●●●●●○
PHP, Symfony, Bref	●●●●●●●○○○
React, Next.js, Vue.js, RxJS	●●●●●●○○○○
REST APIs, WebSockets, Mercure	●●●●●●●●●○
AWS, Serverless	●●●●●●●○○○
Linux (Arch/Debian)	●●●●●●○○○○
Docker, Testcontainers	●●●●●●●●○○
GitHub Actions, CI/CD pipelines	●●●●●●○○○○
PostgreSQL, InfluxDB, MySQL	●●●●●●●○○
MongoDB, Redis	●●●●●●●●○○
Elasticsearch	●●●●●●●○○○
Jest, Chai, Mocha, Sinon	●●●●●●●●○○

HOBBIES & INTERESTS

Professional: Big web application development, Reasearch and Development, company managment.

Personal: Open-source tooling enthusiast (Neovim, Hyprland, QMK ortholinear mechanical builds), sci-fi & gaming.
